PROFESSIONAL SUMMARY

I'm a self-motivated and curious Web Developer currently pursuing B.Tech. I enjoy turning ideas into beautiful and responsive websites using HTML, CSS, and Java Script. I've built multiple front-end projects in web development. I'm constantly learning, exploring new tools, and upgrading my skills to become a full-stack developer. Whether it's solving layout challenges, I love building things that not only work but look good doing it.

PROJECTS

- Jaipur Tourism website** - A multi-page responsive website showcasing tourist attractions in Jaipur.
- Weather App using JavaScript** - A weather application that fetches weather data using an API.
- 3 Homepage Layouts** - Designed and implemented different homepage layouts focusing on responsiveness and design structure.
- Digital Marketing Web Page** - A modern single-page design for showcasing digital marketing services.
- Basic Calculator** - A functional calculator for basic arithmetic operations.
- Bento-Style Layout** - A creative UI layout inspired by modern bento box designs.
- Netflix Clone (HTML & CSS)** - A static front-end replica of Netflix's homepage layout.
